

Dialpad Ai Voice

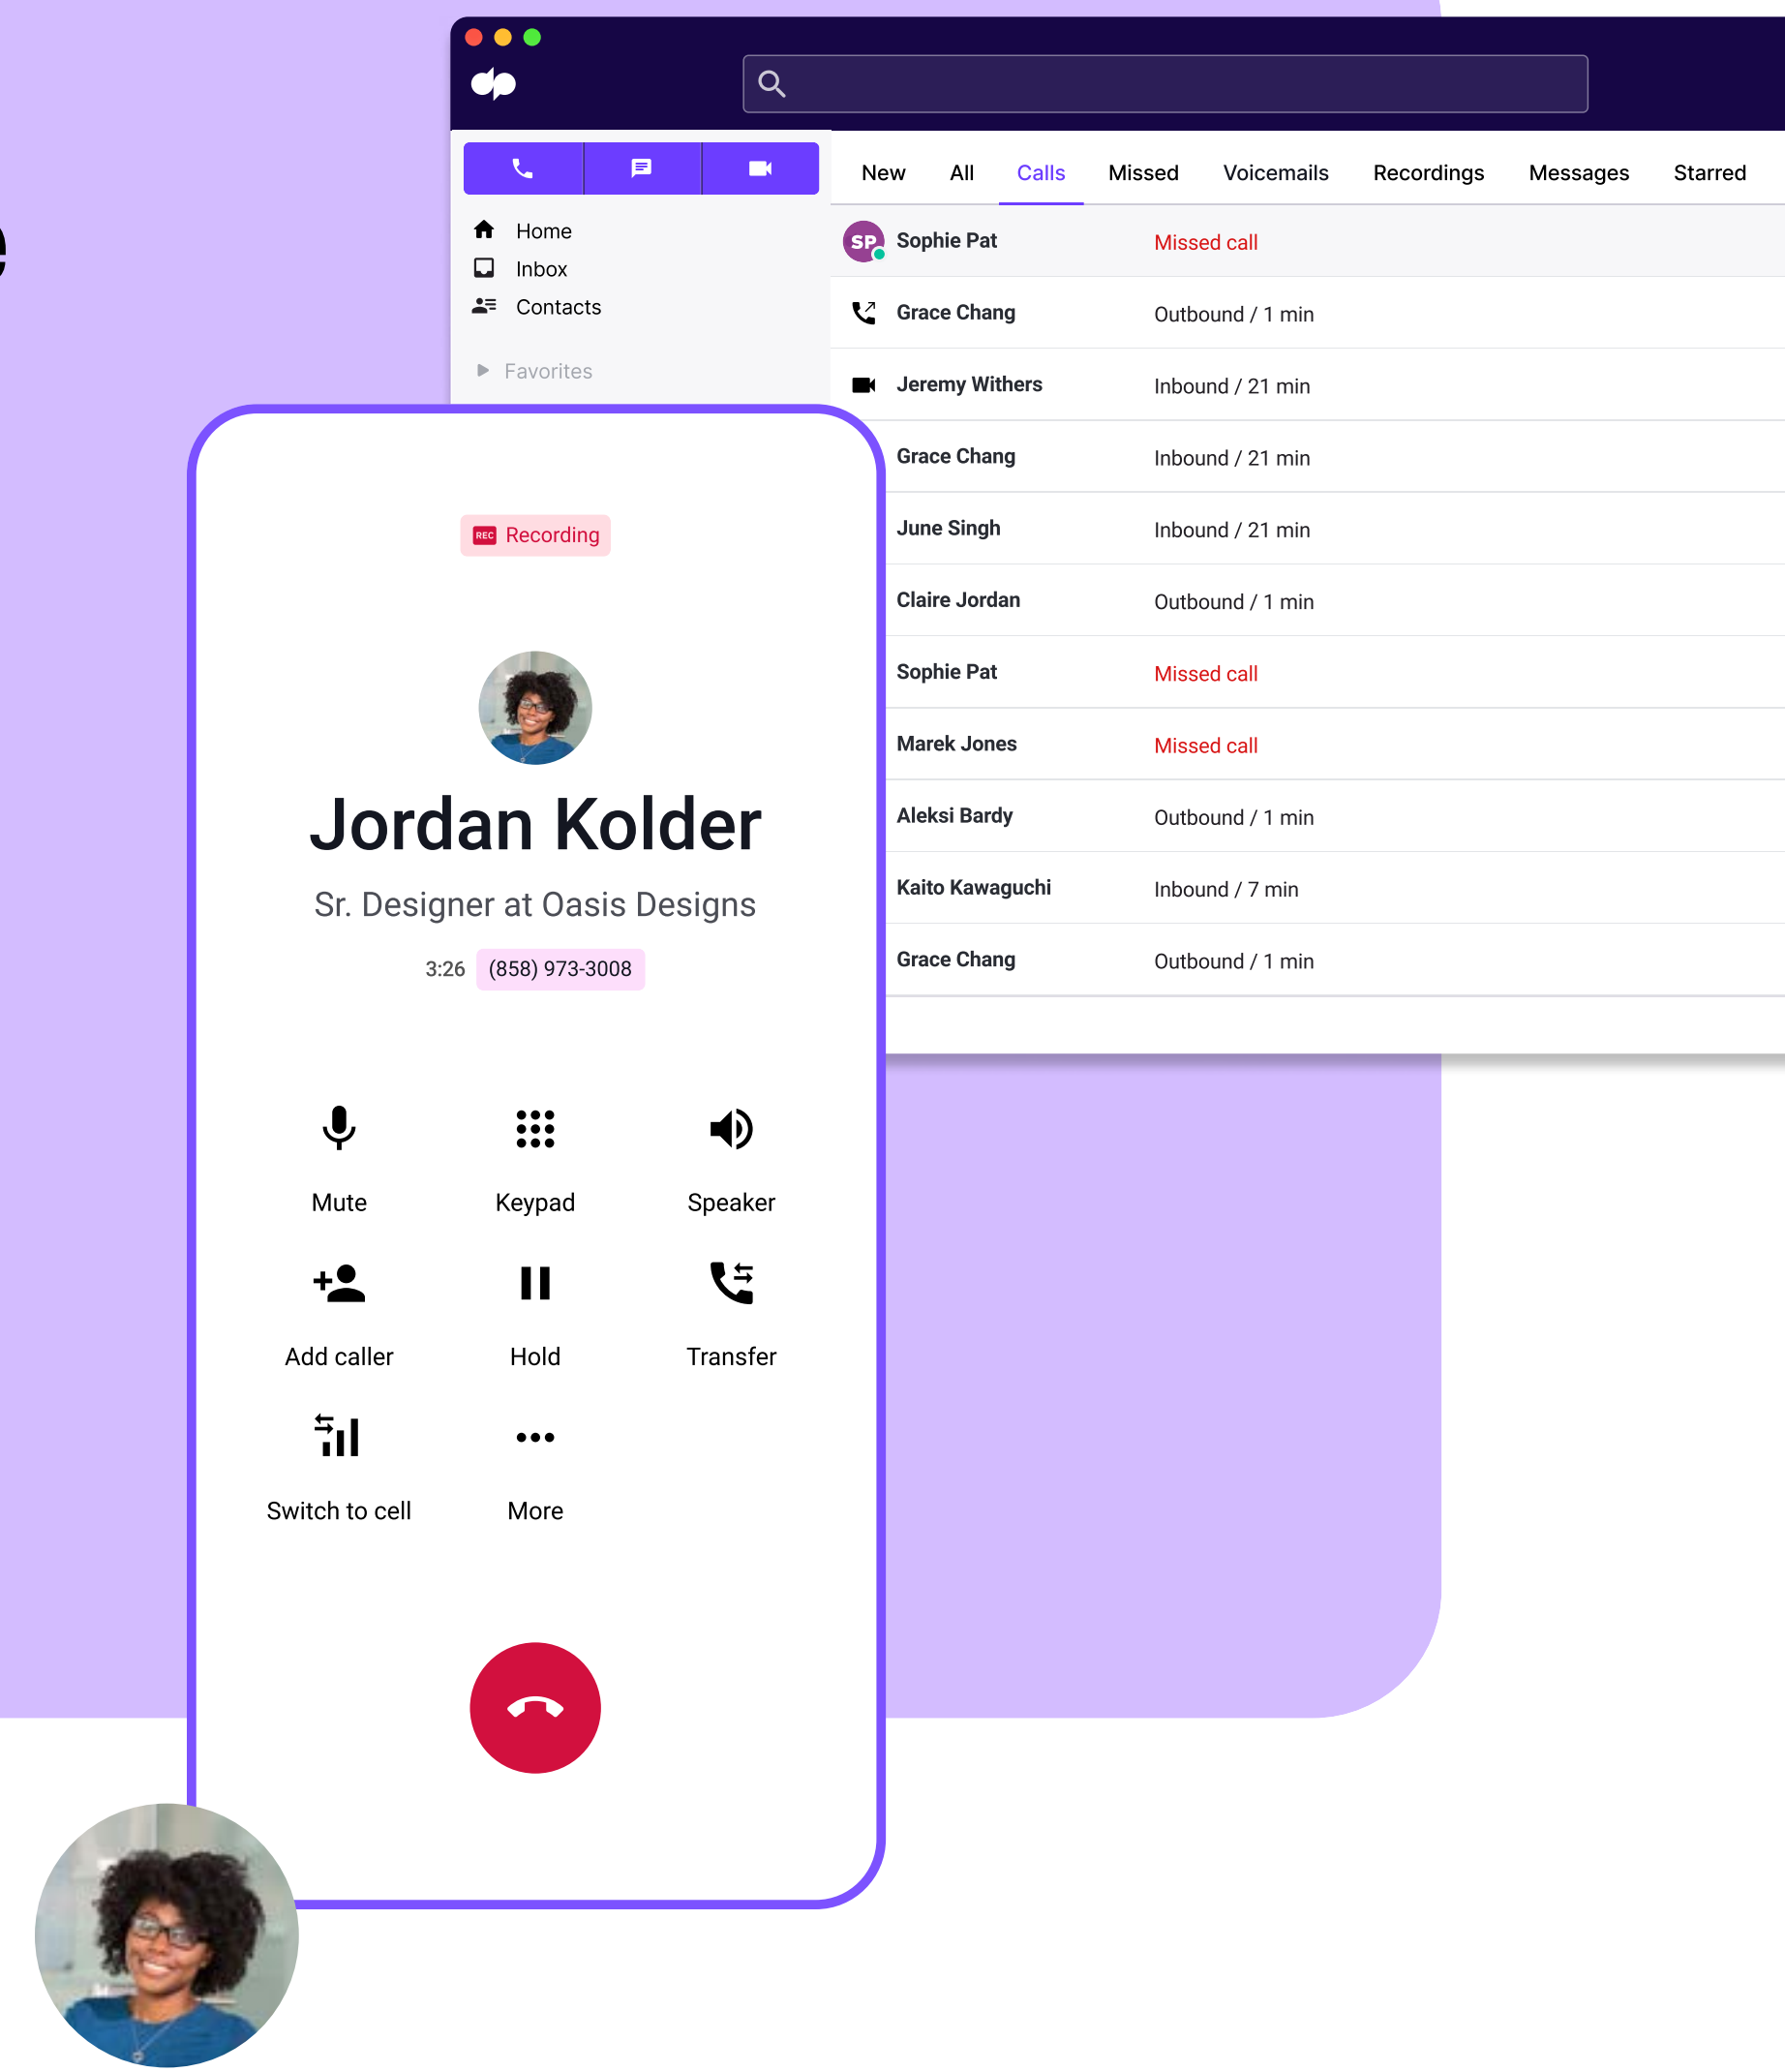

Legacy phone systems are obsolete (yes, we said it). They tie you to your desk, cost an arm and a leg, and haven't offered any new features since the 1930s, when voicemail was invented. Landlines are a relic of the past, and haven't made the transition to the digital age.

Dialpad Ai Voice, on the other hand, does everything that a legacy phone system can do—and everything that it can't. Voice, video, chat, SMS/MMS and more. And it does it all with 100% uptime, so you don't have to worry about dropped calls.

“ We haven't had a major outage since using Dialpad over the last few years.

Robust, versatile, and cost-effective

Just ask Xero, who managed to save \$500,000 in annual telephony costs after they switched over to Dialpad.

[Xero](#) had been running an on-premises PBX system for each of their 17 global locations, which drove up their operating costs because of how expensive it was to set up, maintain, and scale.

Once they moved to Dialpad's cloud-based communications solution, though, all of these costs disappeared. Each of their 1,400 employees could now make unlimited calls from anywhere in the world, for a fraction of the price.

More than just a phone

- Includes standard features like call hold, recording, ring groups, call queues, transfers, and [call flip](#).
- Comes with other communications channels like video calling, conference calls, instant messaging, SMS, and MMS.
- Automatically sync contacts from Google Workspace or Microsoft 365

Built-in Dialpad Ai

- Our powerful, proprietary Ai transcribes your call live, as it happens.
- Ai-powered call summaries include action items and keywords along with your call recording and transcription.

Easy setup, infinite scale

- Talk, chat, and have video meetings using a single app. Dialpad will even work in your browser!
- Add hundreds, even thousands, of new users in less time than ever before.
- Set up custom routing rules and forward callers to a specific device or team member.
- Integrate your favorite tools such as [Salesforce](#), [Zendesk](#), and [Google Workspace](#).
- Dialpad can still integrate with hard phones if required

Call, message, and meet with Dialpad Ai Voice
